

ISTE STUDENT CHAPTER

Industrial Visit to Rainbow Technocast Pvt. Ltd.

Industrial person accompanied: Mr. Dhaval Pansuriya,
Process Engineer,
Rainbow Technocast Pvt. Ltd.

Date: 10/08/2018

Branch: Mechanical Engineering

Semester: 3rd

No. of Participants: 19 + 2 staff members

Faculty Members: Prof. Rajan Chauhan and Prof. Nitin Jayakumar

Summary of the Expert lecture:

In order to enhance the practical knowledge of the students, Mechanical Department of School of Diploma Studies has organized an industrial visit to Rainbow Technocast Pvt. Ltd. There has been wide gap between what is taught in universities and the concepts which are required by the industrial professionals. In order to bridge the gap, we have organized industrial visit to make students aware about the concepts which are important from the practical point of view.

Students were made to visit the Casting Department and Machine Department of the Industry. This was selected keeping in mind the curriculum which is taught to the students in their current semester. It will help students to map the concepts which they are studying with those which will be helpful for them in the industry. All the processes were duly explained to them in order to make them clear about the practical scenario of the concepts which are required by them.

This industrial visit will also be helpful in meeting the learning outcomes of the subject and will help the students to develop a practical mindset to the concepts which they are teaching during their class hours. Ultimately it will make them understand the concepts by actually seeing them happening in the industry which will help in developing their mindset to the curriculum which is taught in class.
